

**Medication Administration Quiz**  
**Sheboygan Area School District**  
**SEIZURE DISORDER**

Name \_\_\_\_\_  
School \_\_\_\_\_

**True or False**

1. A seizure is a common condition that is characterized by an excessive surge of electrical activity in the brain that changes how a person feels, senses things, or behaves. True or False
2. 911 should be called for every seizure that occurs at school. True or False
3. What should you do if a student diagnosed with Seizure Disorder has a seizure that lasts less than 5 minutes?
  - a. Call 911 immediately
  - b. Call the parent immediately
  - c. Remain with the student, protect the head from injury, maintain an open airway, then document and notify parent
  - d. Administer Diastat and call 911
4. If you did not know that the student has a seizure disorder and/or it is the student's first seizure, how long do you wait to call 911?
  - a. Don't wait, call immediately
  - b. 2 minutes
  - c. 5 minutes
  - d. 10 minutes
5. When giving Diastat at school, you should:
  - a. Call 911
  - b. Never give Diastat at school
  - c. Only administer Diastat as directed on the doctor's orders
  - d. a and c

By signing this review, I am willing and voluntarily accept to administer the above medications (as reviewed) to students throughout the school year. I also understand that I may contact the District School Nurse at anytime if I have questions or concerns.
