"The Health Care Pathway at South High is an incredible asset that gives students an advantage after graduation. By providing the opportunity to learn about health care careers earlier, students can move through their educations and training more efficiently, giving them an early boost in their career aspirations. The program also benefits the community as a whole by ensuring that high quality health care professionals will always be available to meet our ever-changing health care needs."

**-Dr. Ashok Rai, MD**  
**President and Chief Executive Officer**  
**Prevea Health**

"Students are actively engaged in the curriculum and demonstrate collaborative, critical thinking, and creative problem solving skills (...) There is strong evidence that all stakeholders understand the importance of skill development in the students' high school experience."

**-Project Lead the Way Certification Committee**

"As I progress through the year, taking classes that I know will help me with my future career, one that I thoroughly enjoy taking is PBS (Principles of Biomedical Science). To me, it is a great hands-on, everyday learning experience that will further prepare me in knowing what to expect in the medical field. It not only is a very informative class, but it is fun at the same time. I highly recommend anyone going into the medical field, or even interested in the medical field to take PBS."

**-Mia, South High Junior**
