

## Testimonials

"The Health Care Pathway at South High is an incredible asset that gives students an advantage after graduation. By providing the opportunity to learn about health care careers earlier, students can move through their educations and training more efficiently, giving them an early boost in their career aspirations. The program also benefits the community as a whole by ensuring that high quality health care professionals will always be available to meet our ever-changing health care needs."

"As I progress through the year, taking classes that I know will help me with my future career, one that I thoroughly enjoy taking is PBS [Principles of Biomedical Science]. To me, it is a great hands-on, everyday learning experience that will further prepare me in knowing what to expect in the medical field. It not is only a very informative class, but it is fun at the same time. I high suggest anyone going into the medical field, or even interested in the medical field to take PBS."

"My experience in the Marian University nursing camp was amazing! I got to job-shadow, learn how to use an AED, learn CPR, and explore the different branches of nursing all within 4 days. The instructors and other students were very welcoming and it was well worth the \$25. Three out of the four days, we walked over to the St. Agnes Hospital to job-shadow and take tours. We toured the hospital, pharmacy and the cancer center next door. We also had a nurse speaker each day that told us the ups and downs of nursing. Upon being accepted into the nursing camp, I received a scrub top and was awarded a \$500 renewable pre-college grant. Each day we were also sent home with different Marian University items such as folders, drawstring bags, pens, cups, etc. I would highly recommend to anyone interested in nursing to apply to this program. The experience is really worth it!"

"The classes my daughter took at South High, such as Medical Terminology amongst others, gave her a big step up over most incoming college freshman"

*-Parent of South High Alum*

"If I had younger siblings, I would tell them to take college credits in high school because the classes go at a slower pace and you gain a lot of knowledge. Taking college credits during high school helped me save a ton of money!"
