

## Become a Summer Scholar

### Save Money. Get Ahead.

Do something for your future and distinguish yourself on your college application by taking an online college course this summer:

- Save hundreds of dollars on tuition
- Get a head start on college
- Transfer credits to any UW school and most private or out-of-state schools

Your choice of three in-demand courses, delivered in **four short weeks**.

Class	Description
<b>Introduction to Computing &amp; Internet Technologies</b>	Introduction to the history of computing, overview of computers, how they work, and relevant applications, especially to web site creation. Introduction to procedural programming using Microsoft Web Development tools part of the Microsoft Visual Studio.NET programming environment, the basics of HTML, CSS, and JavaScript.
<b>Natural Hazards</b>	Exploration of the dynamic character of the Earth System by characterizing and understanding the causes and consequences of natural hazards. Hazards considered will include earthquakes, tsunamis, volcanic hazards (local, regional, global scales), meteorological hazards (hurricanes, tornadoes, flooding, coastal erosion), and landslides.
<b>Contemporary Social Problems</b>	Sociological analysis of the nature, extent, causes, and potential solutions to selected major social problems such as poverty and wealth, racial and gender discrimination, crime and violence, drug abuse, family problems, quality of education, inadequate health care, population problems, intergroup conflict, and threats to the environment.

**Course Dates: July 13-August 9, 2020**
